tawhid.ather@gmail.com | linkedin.com/in/tawhid-ather | github.com/Redsuperninja | redsuperninja.github.io | Highlands Ranch, CO

EDUCATION

B.S. Computer Science, Minor in Biomedical Engineering

University of Colorado Boulder

May 2026

GPA: 3.9

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C#, Java, SQL, Bash

Backend & Web: FastAPI, Flask, Node.js, Express, ASP.NET Core, REST APIs, OAuth 2.0, Angular, React

DevOps & Data: Docker, Ansible, GitHub Actions CI/CD, Linux, PostgreSQL, Snowflake, SQLAlchemy, ETL

AI: AWS Bedrock, LangChain, LLM agents, scikit-learn, Pandas

EXPERIENCE

Software Developer Intern

May 2025 – May 2026

Laboratory for Atmospheric and Space Physics (LASP), CU Boulder

Boulder, CO

- Built Python/Flask backend services and middleware supporting CI/CD pipelines for mission-critical infrastructure used daily by 50+ scientists and engineers
- Automated configuration and deployment of an SMTP notification service and URL shortener across Linux production servers with Ansible and Python
- Built a full-stack URL shortener in Angular and TypeScript, secured with OAuth 2.0 and role-based access control
- Wrote Python and Bash CLI tools and a log parser that automated deployments, maintenance and error detection in production

Senior Resident Advisor

Aug 2023 – May 2026

University of Colorado Boulder

Boulder, CO

- Supervised and mentored 18 Resident Advisors across two halls serving 600+ students; handled confidential records under FERPA

PROJECTS

Festo Agentic Frontend Generator – Senior Capstone (Team of 6) | LangChain, AWS Bedrock, React, Docker Oct 2025 – May 2026

- Architected the core LangChain agent on AWS Bedrock that generates production-ready React/TypeScript frontends from Festo's component library
- Designed a human-in-the-loop validation service with approval breakpoints between pipeline stages; added Docker health checks and restart policies

Budget Buddy | Python, FastAPI, SQLAlchemy, Expo/React Native

2026 – Present

- Building a local-first finance app with encryption at rest (keyring master key, encrypted columns and files), 185+ pytest tests and server/mobile CI

NER Tenets | Python, SQL, Snowflake, PostgreSQL, Docker

2026

- Built a Dockerized ETL pipeline from HUD and Census APIs into raw, staging and analytics schemas on Postgres and Snowflake

Spot U | Node.js, Express, PostgreSQL, Docker

Jan 2025 – May 2025

- Led a team of 5 building REST APIs with Spotify OAuth for 100+ test users; Docker cut setup time 75%; 85% test coverage with Mocha

LEADERSHIP

President, Muslim Student Association, CU Boulder

Aug 2022 – May 2026

- Grew event participation 50% and ran events with 200+ attendees
